WHERE STANDARD ENDS,

possibilities *begin.*

A Rotpunkt kitchen is so much more than just a space for cooking. It is a place to live and enjoy life, where the ordinary ends and individuality begins.

Every surface, every line, every detail invites you to express your personal lifestyle. We combine design with emotion, craftsmanship with innovation, and sustainability with genuine comfort. This blend results in kitchens that are as unique as you and your life. Thoughtfully designed down to the last detail and made for people who expect more than the ordinary.

LIVING
in new
dimensions.

2 Where standard ends, possibilities begin.

4 Behind it all has always been the idea of taking the good even further.

8 Life never stands still. Neither do we.

possibilities
beyond
STANDARD.

14 Where possibilities go beyond the ordinary.

18 There are many kitchens. But only one Rotpunkt.

20 Impressive on the outside. Outstanding on the inside.

22 More choice is good. More possibilities is Rotpunkt.

24 A feel like velvet. A look of pure elegance.

26 Everything fits. Especially together – and with you.

28 Let there be light. Give it a try.

30 See your kitchen in a whole new light.

32 Either way: a crystal-clear decision.

36 A standard height? Not when it comes to your and our standards.

40 Handle-free design impresses – whether gently pressed or guided discreetly.

42 Where others see only niches, we see opportunities.

46 Quality determines the preparation. Long before the first meal.

48 Four ranges, one feeling: wood is always unique.

50 Character doesn't just develop on its own.

54 55,000 possibilities. And in the end, just one is right.

56 What all our products have in common: style and responsibility.

58 Made for today. Designed for tomorrow.

62 Your aspirations are growing. We're right there with you.

66 Welcome to a world beyond standard.

BEHIND IT ALL
HAS ALWAYS BEEN

the idea of taking **THE GOOD** *even further.*

What began simply in 1930 with the manufacture of boxes is now a shining star on the map of kitchen design. Our kitchens, dressing rooms and utility rooms are internationally renowned for their variety, premium quality, durability and sustainability – and all of it 'Made in Germany'.

In 1950, we launched our kitchen production with a classic sideboard. What has driven us ever since is not merely a passion for good design. It is our commitment to constantly reimagining the status quo. That is why Rotpunkt creates furniture that does not stop at the standard – but where the standard is only just the beginning.

LIVING *in new* dimensions.

For more than 70 years, we at Rotpunkt have been designing furniture, inspired by our customers' wishes, shaped by real life and by our commitment never to settle for the expected.

Life never
stands still.
Neither do we.

Ever since we began producing furniture, one thing has been at the heart of everything we do: our customers' lives. It is the heartbeat that drives us – yesterday, today and tomorrow. We listen, sense what matters, and transform these insights into ideas that make everyday life more beautiful.

Every Rotpunkt kitchen is an expression of this philosophy: not an off-the-shelf solution, but a space that adapts to your life. A place where people come together, stories unfold and memories are made. For us, 'living' means creating spaces that exceed expectations.

Where possibilities go *beyond the ordinary.*

Our desire to enrich our customers' lives gives rise to a world of possibilities. Every new idea, every detail, every combination of materials expands your creative scope.

The result is an almost endless interplay of shapes, colours and functions – and it's constantly evolving. At Rotpunkt, we see 'possibilities' as a promise: not simply to offer more choice, but to provide greater freedom to design spaces that suit you today and will continue to inspire you tomorrow.

THERE ARE MANY KITCHENS.

But *only one* ROTPUNKT.

Every dream kitchen starts with the right ingredients: a generous helping of functionality, a good measure of clever ideas and a generous pinch of timeless aesthetics. But it is only the freedom to combine all these ingredients to suit your own taste that makes it a true Rotpunkt kitchen.

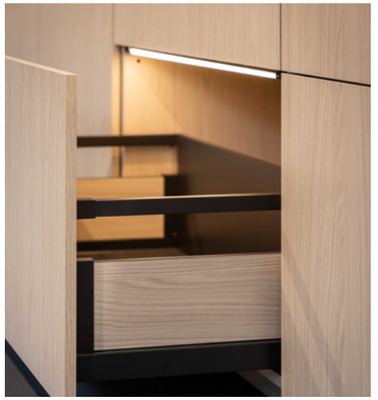

We combine design, function and quality to create furniture that is more than just worktops and storage space – it is the heart of your home. Our range offers you everything your heart's desire needs to be as unique as it is personal: from design with smart interior features, through fronts and cabinet bodies in more than 20 colours, to free-floating 'Cubes'.

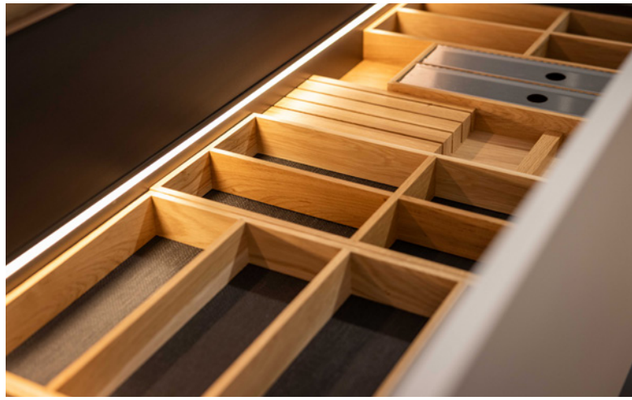

Zerox KQ Textured Grey Stone

Zerox SY VER Loft Dark Oak

It's great that you're not content with just a perfect facade. After all, true quality is revealed in the details. The interior of a Rotpunkt kitchen also opens up undreamt-of possibilities.

Whether it's pull-outs, drawers or accessories in warm wood, stylish zircon or elegant, cool metal with the LEGRABOX design box system – every detail follows the same concept: to create more possibilities where others wouldn't expect them.

MORE CHOICE IS GOOD.

More possibilities is Rotpunkt.

Break away from traditional kitchen conventions. Open up spaces. Create design with room to breathe. That's exactly where Rotpunkt begins. Our free-floating units, the 'Cubes', create a sense of lightness, bring architecture into the room and give it an unmistakable character. Added to this are more than 20 unit colours, opening up almost limitless design possibilities.

A feel like velvet.
A look of pure elegance.

Touch, marvel, fall in love: FENIX® fronts are anything but ordinary. They offer a velvety feel, deep-matt elegance and colours full of expression. Fingerprints? They vanish. Scratches? They can be made to disappear. Discover your dream colour from 27 shades and design your perfect combination in the configurator. Simply scan the QR code.

EVERYTHING FITS.

Especially TOGETHER – and with you.

For your personal dream kitchen, Rotpunkt brings variety to every aspect of your kitchen. Discover clever lighting solutions, choose fronts with or without handles, combine elegant glass elements and select your ideal worktop height.

Let niche solutions step out of the shadows and into the spotlight. A kitchen is only truly personalised when every detail suits you. With this in mind, we create kitchens that are as unique as the lives of their users – and inspire anew every day.

Let there be light. *Give it a try.*

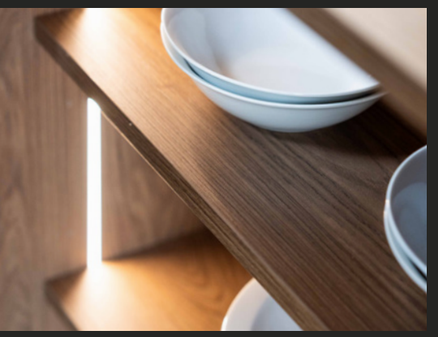

The way to the heart is through the stomach – but you eat with your eyes first. That's why the right lighting is just as much a natural part of a Rotpunkt kitchen. Whether it's LED spotlights, elegant linear lighting or smart indirect lighting effects – with us, light becomes a design element.

With our lighting configurator, you can experience how different lighting moods and colours look during the day and at night before you make your decision.

Simply scan the QR code and give it a go.

SEE YOUR KITCHEN IN A WHOLE **new light.**

Let your kitchen shine – it has every reason to. Bathe it in a soft glow, or create striking lighting accents where you want them. At Rotpunkt, light is far more than just functional illumination. It becomes part of the design, highlights materials and creates atmosphere. With our lighting solutions, you can create highlights exactly where you want them. Choose your perfect lighting package – smart-home-compatible, of course.

Fancy a clearer view? Show off what's worth seeing. Our glass cabinets create a sense of openness, lightness and elegant accents. You decide not only on the glass panelling, but also on the frames, materials and overall effect. Atmosphere isn't created by individual elements – but by their perfect interplay.

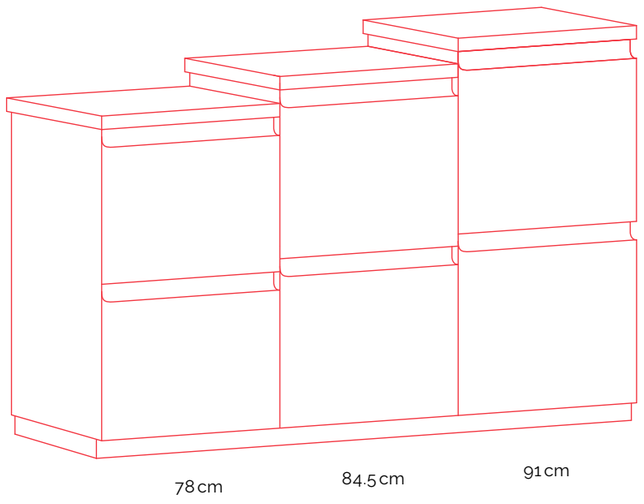

Valley LX Beach Grey

Memory RI Beach Grey

A STANDARD HEIGHT? NOT WHEN IT COMES TO **your and our standards.**

The perfect working height is like a good tailor-made suit. Whether it's our 78 cm cabinet height, 84.5 cm half-grid or 91 cm comfort height, the same principle applies here: you don't have to adapt to your kitchen – your kitchen adapts to you. This creates comfort that makes every movement more pleasant. Back pain has no place in a kitchen.

At Rotpunkt, ‘handle-free’ means far more than just minimalist design. With our high-quality push-to-open mechanism, a gentle press is all it takes for doors and drawers to open almost as if by themselves. The result is a design that is stripped back to the essentials – and it is precisely this that allows it to make the greatest impact.

Where others see only niches,
we see opportunities.

Much more than just a stopgap: our WALL SOLUTIONS system transforms empty wall space into valuable living space. From knife blocks to tablet holders, everything has its place. Organisation becomes a design feature. Where others stop, Rotpunkt's ideas begin.

QUALITY determines the *preparation.*

LONG BEFORE THE FIRST MEAL.

Just as with a good recipe, the quality of the ingredients determines the result. Four high-quality wood ranges give every kitchen its own character. Over 55,000 possible combinations create scope for individual design.

Real wood fronts, wooden internal drawers, sustainable materials and our greenline BioBoard Gen2 ensure that design and sustainability work in perfect harmony. True quality is evident not only at first glance, but over many years to come.

Smala 12 FL Beach Grey

Zerox ME Brass

Memory RI Beach Grey

FOUR RANGES, ONE FEELING:
wood is always unique.

Every piece of wood tells its own story. That's why we offer four distinctive ranges. Each one showcases the natural beauty of wood in its own unique way. So you can find exactly the character that suits your home.

CLASSIC LINE
finely textured, without knots.

NORDIC LINE
elegant veneer with decorative grain, brushed and without knots.

FOREST LINE
with visible wood and knot texture.

OAK LINE
with deep, vibrant textures.

We love bringing the natural look of wood into the kitchen – for example, with wooden drawers. This helps to create a healthier indoor environment and adds a natural touch of cosiness.

Character doesn't
just develop on it's own.

Our RAW front design impressively demonstrates what precision craftsmanship can achieve. The striking oak veneer front combines a solid appearance with intelligent construction. Whether brushed or sandblasted, the result is an exceptionally vibrant surface. Every front is unique – because real wood knows no standards.

Zerox Match KQ Taj Mahal

Zerox VER SY Scandinavian Fjell Oak

55,000 possibilities.
And in the end,
just one is right.

With wooden fronts and cabinet bodies alone, there are more than 55,000 possible combinations. But it's not the number that matters. What matters is finding exactly the combination you want. Fortunately, we're world champions at customisation and passionate about creating combinations – so that, from all the possibilities, we can create the one kitchen that suits you perfectly.

What all our products have in common:
style and responsibility.

At Rotpunkt, sustainability doesn't just begin with the finished furniture. It's already embedded in our choice of materials. Certified. Durable. Climate-friendly. For us, sustainability is not just an additional feature, but part of our understanding of quality.

MADE FOR TODAY.

Designed for tomorrow.

greenline BioBoard Gen2

Our greenline BioBoard Gen2 is made from up to 90 per cent recycled wood and therefore acts as a natural CO_2 sink. At the same time, it meets the world's strictest F4Star standard and even falls well short of its requirements. This is how we combine sustainability with uncompromising quality. The future begins where we refuse to settle for today's standards and conventions.

Cradle to cradle is an approach to a consistent and coherent circular economy and the use of recycled materials.

By choosing FSC®-certified products, you are supporting responsible forest management.

The Nordic Swan, known in Scandinavia simply as "The Swan", is a Type I environmental label (ISO 14024), that indicates how environmentally-friendly products are in comparison to competing products, according to an independent third party. It is an eco-label awarded by the Nordic Council of Ministers.

The Blue Angel is an environmental label for highly environmentally-friendly products and services. In the case of chipboard, formaldehyde emissions are an important criterion used when awarding the seal. Before receiving the award, the chipboard is certified by the independent RAL Institute.

The California Air Resources Board (CARB) is a governmental commission of the state of California in the United States. The advisory body, which has been in existence since 1967, is internationally renowned for its particularly stringent legislative proposals on air pollution control.

Your aspirations are growing.
We're right there with you.

Why should good design stop at the kitchen door? Whether it's a sideboard, living room furniture, a dressing room or a utility room: our design ideas accompany you throughout your entire home. This creates cohesive living spaces with the same quality, the same design language and the same attention to detail.
